

WHO WE ARE

AMR, Inc. was founded in 1975 and quickly became a leading manufacturer of electronic monitoring, control, and communications systems for mining and tunneling operations around the world. In 1992 that expertise was diversified into the quarry, aggregates, and water/wastewater markets. Since that time, AMR's automation team has worked on over 40 major projects and provided ongoing technical support, calibration services, and upgrades to customers in the Eastern U.S. from New York to North Carolina.

KEY BENEFITS

- Electrical and mechanical design engineers, field service, and repair technicians on staff
- "Off-the-shelf" philosophy to only use available, non-proprietary products and provide all programs, licenses, etc. when the task is complete to the client's satisfaction
- UL 508A-certified panel shop for customized control solutions
- Authorized system integrator for Inductive Automation®, Rockwell / Allen-Bradley®, and Wonderware® SCADA platforms
- Experience with all major (and several not so well known) brands of PLC's and instrumentation

OUR SERVICES

- Turnkey automation projects
- SCADA development and programming
- PLC installation and configuration
- Control panel manufacturing
- Speed, level, and other sensors
- Cellular, satellite, radio, or landline telemetry
- Field instrumentation installs with setup
- Instrumentation calibrations
- Technical documentation services
- On-Site operator training
