

AMR PEMCO

PROVEN PARTNER IN TECHNOLOGY

Manufacturer of Custom Electrical Equipment

Custom Panels, Switchgear, and Enclosures

- Turn - Key Solutions
- Custom enclosure design / UL / CE Certifications available
- Customer power, control, and SCADA panels
- Custom 3D copper bus bar design and fabrication
- Breaker Cabinets
- PLC, Drives, and Control

Deposits on Base Enclosures

- DOBE's
- Designed to be placed over existing equipment on a concrete pad or other foundation
- Minimal on-site assembly required
- Mild, Stainless, and Galvannealed steel construction available

Dry Type Transformers

- 100 to 10,000 KVA (10MVA)
- Primary voltages up to 34.5 kV
- Meets all IEEE Standards
- UL approved Varnish and VPI System
- Drive Rated, Rectifier Duty, and Excitation Static Star Applications
- Custom Enclosures and packaging options
- UL and CSA certification available

Power Distribution Buildings

- All steel construction – Mild, Galvannealed, or Stainless
- Specialize in the installation and electrical integration of equipment within the building a
- Custom and specialized HVAC systems
- Modular buildings available for large footprints

Skid Mounts

- Fabrication capabilities for harsh duty environments
- Oil and Gas, Mining, Tunneling, and utility applications
- Galvanized and Stainless Steel construction available
- Ground check / Ground fault, data monitoring, automation controls, and communications options

AMR PEMCO Engineering

- In house engineering team
 - * Mechanical, electrical, and transformers
- PE certified and stamped designs for structural and electrical projects
- 3D modeling of all mechanical designs with Solid Edge Software
- ASME and IEEE members

Delivering quality electrical solutions for over 60 years

1960 Valley Dale Street
Bluefield, VA 24605-9454
